My Projects

Homemade Goods Selling Website

An e-commerce website that is designed using HTML, CSS and Java Script for the front end and PHP and MySQL for backend development that specializes in the sale and purchase of homemade goods.

[View](#)

Driving School Management Website

The website is built using HTML and CSS for the front end, and Python Django for the back end. It is designed to streamline the process of connecting students, driving schools, and private tutors, providing a user-friendly and efficient platform for all stakeholders involved in the driving education process.
